

## DUELLING PIANOS RETURN TO HOWL AT THE FULL MOON

STORY **PANAYIOTA**

**D**uelling pianos date back to the late 1890s when ragtime was the genre of the day and musicians played and played and played, trying to out-perform each other.

Today, this unique performance consists of two pianists battling it out across facing baby grand pianos.

"Here at the Full Moon Hotel (FMH), Sandgate, we listen to our patrons who all too often ask, 'When's the next show?'" Kay Navarro, Marketing, said.

So without further ado, the FMH presents Howl at the Moon on Friday 18 February..

Brisbane's world-class performers, Holly and Steve, love what they do and are set for an exciting evening of entertainment. They're bringing their A-game with your favourites from 80s rock, 90s pop and even today's dance hits.

"I am looking forward to getting them wound up on the dance floor with the thunder Steve and I bring every show," Holly said.

"We are very much looking forward to playing at the beautiful and iconic, famous Queensland pub, The Full Moon," Steve said. "And yes, we will be howling."

So put on your best dancing shoes and join in the fun. Howl at the Moon is a free event, open for dinner, drinks and a good sing-along too. Reservations for dinner are highly recommended via [www.fullmoonhotel.com.au](http://www.fullmoonhotel.com.au) or by phone on 3869 0544.

## New Starbucks Cafe to Replace Car Sales Yard in Deagon

STORY **ELISABETH WALSH**

**A** development application has been lodged for a Starbucks with a drive-through facility in Deagon. The proposal, designed by Mercury Design, aims to develop the cafe at 174 Braun Street, removing an existing car sales yard.

The proposed food and drink outlet will provide a gross floor area of 193.9 square metres, including indoor dining and a drive-through facility that can accommodate up to 10 vehicles.

The development also includes onsite parking for 13 vehicles, as well as adequate vehicle and pedestrian access.

Operating hours for the new Starbucks Cafe would be Monday to Sunday, 24/7. According to the planners at Somerville Consultants, the development has been designed to meet the commercial needs of the area while minimising any adverse effects on surrounding properties.

"The site is considered an ideal location for increased commercial development," a spokesperson at Somerville Consultants said.

"The proposed structure is deliberately located towards the centre of the site to maximise pedestrian and vehicular safety while minimising any potential unfavourable amenity and noise impacts on the nearby sensitive uses.

In addition to the considerable setbacks, building separation and landscaping, the development maintains (a) low level of amenity and noise on the nearby residential uses."
